THE PRESIDENT'S MESSAGE

CSI'S NEW YEAR BEGINS!

MR. R. AARON MILLER, CSI, CDT, AIA
 Design Innovation Architects
 CSI Knoxville Chapter President
AMiller@dia-arch.com

Well, if there was ever a second new year, I would say it is at the end of Summer break when vacations come to an end, people head back to work, and students head back to school. Coincidentally, this too is the start of CSI's new year each July when officers, directors, and chairs transition into their new roles and responsibilities. On that note, I would like to say *Thank You* for allowing me to serve you as President for this upcoming year. It is truly an honor to be a part of this long-standing and successful Chapter and this year's leadership group is eager to continue building upon the strong foundation our past leaders and members have created.

CSI Knoxville had a great and busy year and it shows with our Chapter being awarded, yet again with the Outstanding Chapter Commendation for FY 2018 by CSI National. I would like to give a big *Thank You* to the previous officers, directors, chairs, and those who volunteered their time this past year to make it a success. We want to continue with the same momentum pushing forward into this new year.

With each new beginning comes new goals and initiatives, as well as challenges. This past June our Chapter hosted the Gulf States Region Conference. During the conference we learned from our regional leadership that CSI membership across our region is currently down from years past. During last month's annual planning retreat, the Knoxville Chapter decided to make membership growth one of their top priorities this year and has set an aggressive goal of increasing our membership by 50% prior to June 2019. We are also targeting 15 members in our local Student Chapter and will be looking to strengthen our relationship with our local higher education institutions.

This goal will take a team effort from us all and we ask that each member assist us in reaching out and inviting non-members to visit a Chapter meeting and consider becoming a member of CSI. Ideally, it would be great to have a CSI member in each of the firms, companies, etc. in our area. Note that the meal for first time visitors is free at our monthly Chapter meetings, so reach out and invite someone.

In addition to increasing our membership, we are looking to emphasize and boost the benefits of being a member of CSI, as well as increase membership participation. Come out and be a part of our monthly events, particularly our monthly Chapter meetings where the cost of your meal is covered by your annual membership dues. Below are some of the benefits that CSI members receive:

- Networking opportunities amongst the various roles of the construction industry, not only locally, but regionally and nationally.
- Access to construction industry news and resources, standards and formats.
- Webinars and regular events that bring real world solutions to the ever-changing construction climate.
- Certification opportunities for Construction Document Technician (CDT), Certified Construction Contract Administrator (CCCA), Certified Construction Specifier (CCS), and Certified Construction Product Representative (CCPR).
- Continuing Education (CEUs) opportunities through monthly Chapter meetings, lunch 'n' learns, conferences / conventions, webinars, etc.
- Social events through the Golf Tournament, Christmas Party, 4th of July Celebration, Decompression Hour, etc.
- Membership discounts.

Our mission is to *provide a community to communicate, collaborate, network, and educate for the advancement of the design and construction industry*. We look forward to seeing you at our upcoming functions, and don't forget to bring a friend!

Mr. R. Aaron Miller, CSI, CDT, AIA
 Design Innovation Architects
 CSI Knoxville Chapter President

PRESENTATION SUMMARY

TILE OF SPAIN

Ryan Fasan, Technical Consultant for Tile of Spain ryanfasan@gmail.com

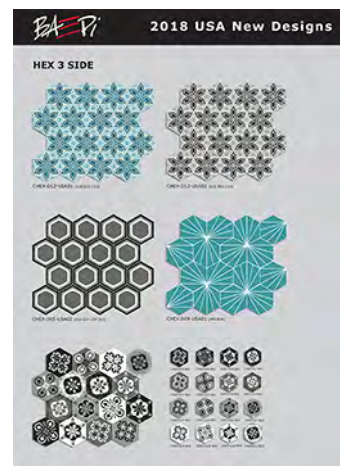

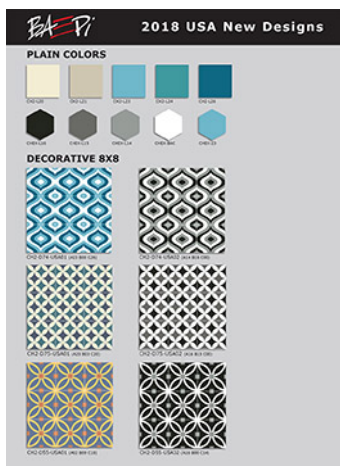

Overview:
1 HSW credit hour for AIA & IDCEC

Objective:
Showcase the latest ceramic tile technologies and products available in the market to Knoxville architects.

Ceramics For Life: Consumer & Design Trends 2018:
2018 is the perfect storm of a technological boom and an eclectically driven consumer that is giving rise to a plethora of new synergistic options. This CEU explores what's trending and what's next in Spanish ceramic tile by comparing prevailing design trends that help interior designers and architects develop a stronger understanding of modern ceramic tile's broad appeal and applicability

Ryan Fasan Biography:
Tile of Spain technical consultant Ryan Fasan has over 20 years experience within the ceramic tile industry in product development, architectural sales, specification, and as a journeyman under European master tile-setters. His worldly experience in ceramics give him a uniquely encompassing command of all aspects of the tile industry. Specializing in ceramic tile trends, innovation and research, Ryan has created and delivered seminars all

September CSI Meeting

EXACT TILE will be hosting Knoxville CSI, September 11, 2018, 11:30 am, at their showroom 108 Hayfield Road, Knoxville, TN 37922

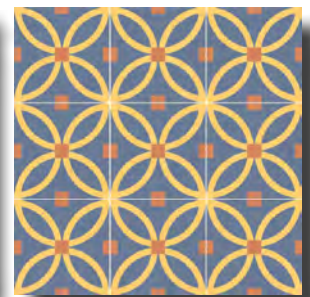

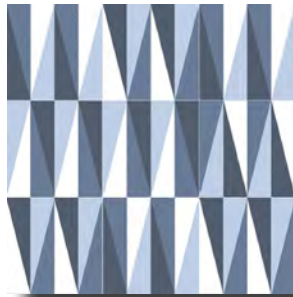

Speaker will be Tile of Spain technical consultant **Ryan Fasan**. He has over 20 years experience within the ceramic tile industry in product development, architectural sales, specification, and as a journeyman under European master tile-setters. His worldly experience in ceramics gives him a uniquely encompassing command of all aspects of the tile industry. Specializing in ceramic tile trends, innovation and research, Ryan has created and delivered seminars all over the world on behalf of Tile of Spain.

Objective: Showcase the latest ceramic tile technologies and products available in the Knoxville market.

Ceramics For Life: Consumer & Design Trends 2018: 2018 is the perfect storm of a technological boom and an eclectically driven consumer that is giving rise to a plethora of new synergistic options. This CEU explores what's trending and what's next in Spanish ceramic tile by comparing prevailing design trends that help designers develop a stronger understanding of modern ceramic tile's broad appeal and applicability.

RSVP to Marni Redmond marni@exacttile.com 865-693-1298

Exact Tile was founded by Zac Redmond in 1999 and is currently one of the most requested design, supply and installation teams in East Tennessee. Servicing General Contractors, Architects, Interior Designers and the public. While the company's main projects are high end residential, Exact Tile is equipped to supply and install commercial projects large or small. Exact Tile offers one of kind customer service, hands on design, quality installation of all their products and unique tile lines. Purchasing direct from their exclusive manufactures such as Walker Zanger, allows Exact Tile to be very competitive not only with pricing but selections. With on staff designers, the selections and design are guided through the necessary steps of a successful project.

Exact Tile is one of the very few suppliers in the area that can provide sales and installation, with tile and stone being their sole specialty. Exact Tile takes pride in hiring the best available talent in the tile industry. Exact Tile's installation crews have installers with at least 15-20 years of experience. Keeping up with industry standards is also important. The company is a member of the National Tile Council of America and the Ceramic Tile Distribution Association. Exact Tile is also heavily involved with its local Interior Design Society of East Tennessee, Knoxville Chamber of Commerce, Knoxville Chapter of the Construction Specifications Institute and the Tennessee Chapter of the International Interior Design Association. The company has been built on a reputation of providing the best quality materials, installation, design and service for its clients.

Mission:

Exact Tile Inc, has built their business on Character, Integrity and servicing our customers to the highest standard.

CSI EDUCATION

WHAT I LEARNED FROM CSI...
HUMIDITY CAUSES

MR GARY T. BERGERON, CSI
Kelso-Regen Associates, Inc.
CSI Knoxville House Committee
gary@kelso-regen.com

Since the summer season is in full swing, many of us take refuge in an air-conditioned structure for a break from the heat. A side benefit of air conditioning is the lower humidity levels which provide additional comfort. If air conditioning is not operating correctly, however, increased humidity levels can cause paper to jam in copy machines and printers, paperback book covers to curl, and wall hung artwork to become wavy. Recently, I was invited to visit a recently completed building with these exact symptoms.

Some of the items that are possible causes of high humidity in an air-conditioned building are:

1. Too high a discharge air temperature from the HVAC unit resulting from a low refrigerant charge. The air temperature needs to be in the mid to upper 50 degrees to dehumidify the space and can be measured with non-contact laser thermometer on the supply air grilles.
2. A negative air pressure in the building which can be diagnosed with a small piece of toilet paper held at the door jamb with the door cracked open. If the toilet paper blows inward, the building is under a negative pressure which is NOT desired.
3. Building envelope problems with an incomplete leaking air barrier which can be diagnosed with a blower door test.
4. Moisture source intrusion into the building which can be diagnosed with a FLIR camera which provides infrared images.
5. A clogged or slow draining HVAC unit condensate drain pan or drain pipe which re-evaporates condensate water into the supply air stream. This is diagnosed by observing end of drain line and checking for draining water while the compressor is operating.

HVAC units located in warm warehouse

Condensate water in auxiliary drain pan

I climbed a ladder at the HVAC units and discovered the problem. This particular building had an HVAC unit with a clogged condensate water drain line. Condensate was not draining correctly, accumulating inside the unit, and the HVAC unit fan was re-evaporating the condensate water into the supply air stream causing the humid conditions. The excess condensate was spilling out of the unit access door into the auxiliary drain pan under the unit. Because the unit was located near the roof in

a warm unconditioned warehouse area, the water was evaporating before the drain pan float switch de-activated the unit and made the problem obvious.

The next time you enter an air-conditioned building and feel that uncomfortable clammy temperature, consider the possible causes listed above.

A **FLIR Camera** is a brand name, but the infrared images can show many things such as missing insulation, moisture intrusion etc. Please see the attached report and photos for infrared images of building problems.

Symposium at 8:00am

UT College of Architecture + Design Fab Lab, 525 North Gay Street, Knoxville

Keynote at 5:30pm

UT College of Architecture + Design, Art + Architecture Building Auditorium,
Rm. 109, 1715 Volunteer Boulevard, Knoxville

University of Tennessee Governor's Chair for Energy + Urbanism
& UT Institute for Smart Structures present a research symposium

The Future of Large-Scale Additive Manufacturing in Design

With the promise of unlimited potential coupled with material and energy efficiency, additive manufacturing is changing the way we build, and many of the creators and leading innovators of building-scale 3D printing are located within two hours of the University of Tennessee.

Purpose

This symposium and lecture bring together innovators who will discuss the state of large-scale additive manufacturing, emerging research and future implications of its widespread application in design.

Presenters

- UT College of Architecture + Design
- Skidmore, Owings & Merrill
- Oak Ridge National Laboratories
- Local Motors Industries
- Branch Technology
- Berkeley College of Environmental Design

Symposium

8:00am - 12:15pm
